Exemplar Assistant

Talk about your day on your phone, then fill your weekly Exemplar card on your laptop in one click.

How it works. You record what you did each day in the **Diary app on your phone**. At the end of the week, the **Chrome extension on your laptop** reads your diary, works out the entries, and fills in your card on Exemplar. It stops at **Save as Draft**. You check it and submit it yourself.

SECTION 1

Set up

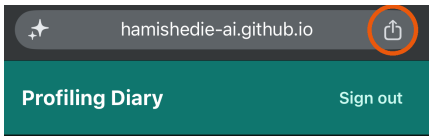

Do this once

You need: a phone, a laptop with Google Chrome, a free Google account (for the free Gemini key, in step 4 of part A), and about 15 minutes. This guide has two sections: **1. Set up** (once) and **2. How-to guide** (each week).

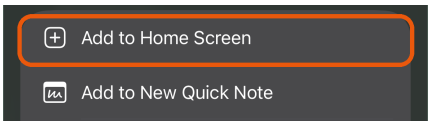

A. The Diary app on your phone

1. On your phone, open your browser (**Safari or Chrome**, either is fine) and go to the address on the right, or scan the code with your camera.
2. **In Chrome:** tap the **Share** button at the top (next to the web address), tap **View More**, then **Add to Home Screen**, then **Add**.
   In Safari: tap **Share** at the bottom of the screen, scroll down, tap **Add to Home Screen**, then **Add**.
   Open it from the new Diary icon.
3. Tap **Create account**. Use your email and a password you'll remember (8+ characters). Use the same ones on the laptop later.
4. Tap the big **microphone**. The first time, it asks for a free **Gemini key**. Get one at **aistudio.google.com/apikey** (sign in with Google, tap Create API key, copy it), paste it into the app and tap Save. It stays on your phone.
5. Try it: tap the mic, say what you did, tap it again to stop. Check the text, then tap **Save day**.

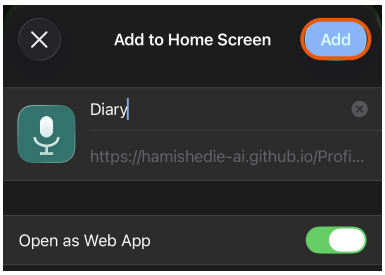

https://hamishedie-ai.github.io/exemplar-assistant/

1. Chrome: tap the Share button at the top, next to the web address

2. Tap View More, then Add to Home Screen

3. Tap Add (leave Open as Web App on)

Screenshots are from Chrome on iPhone. Your screens may look slightly different.

B. The extension on your laptop

Download the extension
https://hamishedie-ai.github.io/exemplar-assistant/ExemplarAssistant.zip

1. Click the orange box above to download **ExemplarAssistant.zip**. Find it in your Downloads folder.
2. Unzip it (right-click, Extract All). Move the unzipped **ExemplarAssistant** folder somewhere permanent, such as Documents. Don't delete it.
3. In Chrome, type **chrome://extensions** in the address bar and press Enter.
4. Turn on **Developer mode** (top right).
5. Click **Load unpacked** and choose the unzipped **ExemplarAssistant** folder.
6. Click the puzzle-piece icon in Chrome's toolbar and **pin** Exemplar Assistant. Clicking its icon opens the side panel.
7. In the panel, open **Setup**, paste the same Gemini key, and press Save.
8. Under **From my diary**, sign in with the email and password from your phone.

Done. Set up is finished. You only do it once.

Please read

This is an unofficial helper made by an apprentice. It is not connected to Exemplar Services. Check Exemplar's terms, and you are responsible for what ends up on your card. It never submits for you.

Your diary is stored on a small online service run by Hamish (the person who built this), so he can technically see what's stored there. Only you can see your entries when you're signed in, but don't put anything private in it.

Your voice, text and photos are sent to Google's Gemini to be turned into text and entries. Don't include customer names, addresses or faces.

SECTION 2

How-to guide

What to do each week

During the week (phone)

• At the end of each day, open the Diary, tap the mic and say what you did, roughly how long, and what tools and materials you used.
• Add photos of the work (no faces, no customer details). They get attached to the right entry.
• Check the text, fix anything wrong, then tap **Save day**. Tap the red x on a photo to delete it, or **Clear this day** to wipe the day and start again. **This week** shows which days you've done.

End of the week (laptop)

1. Open **Exemplar**, log in yourself and go to **Cards > New Card**.
2. Open the extension. Tap the dates line to pick the week, or use the < > arrows.
3. A green **tick** means that day is saved on your phone. A red **cross** means nothing is saved. Tap a red cross to add that day on the laptop (it takes you to **Create new entries**, where you type or dictate it and press **Add to my diary**). Saturday and Sunday are grey and blank.
4. Tap a ticked day to read what you saved. Use **Leave this day out** if you don't want it on the card.
5. Press **Fill my card**. It shows **Done** or **Error** and tells you what to do next.
6. Look the card over on the page. Press **Save as Draft**, then submit it on Exemplar yourself.

If something goes wrong

• **Error: not on a New Card page.** Go to Cards > New Card and press the button again.
• **Error part-way through.** Refresh Cards > New Card first, so nothing gets added twice.
• **The extension doesn't show.** Check it's switched on at chrome://extensions, and pinned.
• **Voice is slow or stuck.** Record shorter clips, or use the keyboard's microphone key instead.
• **Gemini limit.** The free key has limits. Wait a minute and try again.
